

The Scoop

From Miss Hutchinson's Class

March 28, 2008

In our classroom over the past two weeks we:

- learned about lighthouses
- created our own lighthouses
- used mirrors to do a science activity about light
- finished up our study of Native Americans by playing Native American Bingo
- learned about symmetry and lines of symmetry
- made symmetrical designs using pattern blocks
- created symmetrical dragonflies
- made symmetry magnets
- have been reading books by Angela Johnson and Kevin Henkes to see what characteristics they use in their writing

FYI

Our class will be performing in school meeting next Friday, April 4.

We hope that you will be able to watch us perform.
